DETAILED ACTION

Claim Rejections - 35 USC § 103

Claims 32 to 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Birkhahn et al or Brunengraber et al (4,997,976) in combination with Lafferty. The two primary references disclose esters of hydroxybutyric acid and acetoacetic acid and their use as nutrients. Lafferty discloses that the D form of hydroxybutyric acid can be used in parenteral nutrition since it occurs naturally and is therefore immediately available to the body. It would be obvious from these teachings to use the D form of the free acids, their salts or esters in nutritional supplements or in food. The instant compositions are considered to be prima facie obvious over the combined teachings of the references absent evidence of unexpected properties for the claimed compositions.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references are cited to show the state of the art.
